Graffiti-Ex, Exterior Use

The graffiti remover for smooth, non-absorbent base materials **OUT OF DOORS**.

Suitable for:

Buses, railways, cars, lorries, construction vehicles, telephone boxes, shop windows, billboards, vending machines, blinds, casings etc.
 - **Not suitable for the façades of buildings (concrete/stone).**

Application:

Spray Graffiti-EX on the surface evenly and allow to act for a short time. Then remove the dissolved paint with a moist sponge or cloth, only working in one direction. The period for which the product needs to act depends on the nature of the contamination with graffiti (base, material, paint, multiple layers, age,...). Repeat process for stubborn cases and, if necessary, leave the product to act for a longer period.

Note:

Always test an unobtrusive area for compatibility with the material and fade resistance, in this case apply the graffiti remover with a cloth.

Contents	Art. No.	Pack/Qty.
500 ml	893.135	1/12

Graffiti-Ex, Interior Use

The graffiti remover for smooth, non-absorbent base material **INDOORS**.

Suitable for:

Buses, railways, cars, sanitary systems etc.
 - **Not suitable for the façades of buildings (concrete/stone).**

Application:

Spray Graffiti-EX on the surface evenly and allow to act for a short time. Then remove the dissolved paint with a moist sponge or cloth, only working in one direction. The period for which the product needs to act depends on the nature of the contamination with graffiti (base, material, paint, multiple layers, age,...). Repeat process for stubborn cases and, if necessary, leave the product to act for a longer period.

Note:

Always test an unobtrusive area for compatibility with the material and fade resistance, in this case apply the graffiti remover with a cloth.

The problem-solver for large areas of extreme graffiti, especially on painted base materials.

- ▶ Very high cleaning power.
Your advantages:
 - Paint, colour and felt pen graffiti can be removed effectively.
 - It is not necessary to repaint.
- ▶ With special paint solvents.
Your advantage:
 - Damaging layers of paint are lifted and dissolved off without damaging the base material.
- ▶ Does not harm material or surface.
Your advantage:
 - Surfaces containing solvents are not damaged.
- ▶ Wide range of applications.
- ▶ Contains no AOX
- ▶ Contains no silicon

The problem-solver for graffiti on sensitive surfaces.
